

User-friendly handle for easier grip and no-touch technique. Connects to a standard collection bag if necessary.

Urotonic™ Surface Technology for low friction and maximal comfort.

Smooth catheter eyes.

Optimal tube length, for complete bladder emptying.

Not manufactured with PVC, phthalates and not made with natural rubber latex.

Intended Use

The LoFric® Sense™ single use urinary catheter is intended for intermittent urinary catheterization.

Sterilization & Shelf Life

All catheters are sterilized by irradiation. Information about the recommended best-before date is printed on the package.

Package

Individual "peel-open" packaging.
30 catheters per carton.
4 cartons per shipping box.

Material Composition

Hydrophilic surface coating: Polyvinyl pyrrolidone (PVP).

Catheter: polyolefin-based elastomer (POBE).

Wetting pouch: Laminate foil of polyethylene terephthalate (PET), aluminum and polyethylene (PE). Sterile water with sodium chloride (NaCl).

Item package: Laminate foil of polyester with aluminium oxide (PET/Alox), linear low density polyethylene (LLDPE), aluminium foil.

Product Range

Reference	Type	Length	Size
4160850	LoFric® Sense™	6 in	FR 08
4161050	LoFric® Sense™	6 in	FR 10
4161250	LoFric® Sense™	6 in	FR 12
4161450	LoFric® Sense™	6 in	FR 14

- **Safe** – comfortable, complete emptying and proven safe for long-term use.
- **Hygienic** – before, during and after use.
- **Convenient** – functional design from storage to disposal.

Smarter design, safer catheterization.
Now that makes Sense.

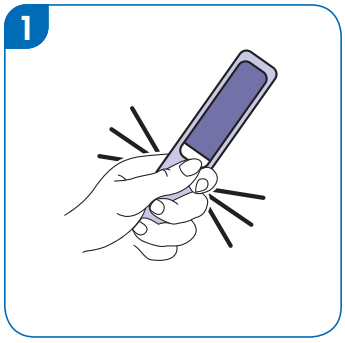

User friendly dispenser box.

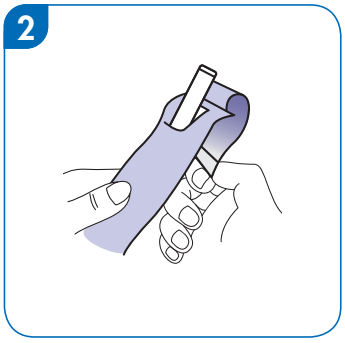

Instructions

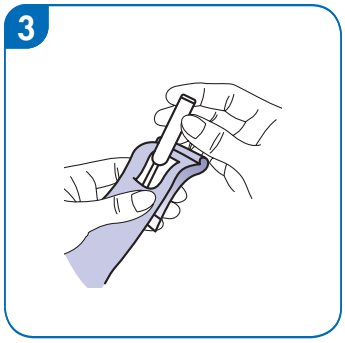

Start by washing your hands with soap and water.

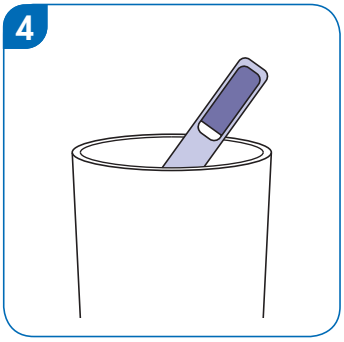

1. Squeeze package and break the water packet to soak the catheter before use.

2. Peel open label.

3. Hold flap and remove catheter.

4. After use, return catheter to package and reseal label. The outer packaging doubles as a hygienic and discreet disposal pouch. After use, dispose of the catheter appropriately (state and local regulations may vary).

Important information

The water pocket contains sterile salt solution that should only be used for soaking the LoFric catheter.

Store in a dry place at room temperature. Do not use if the catheter or the individual package has been damaged or if the seal (INTEGRITY SEAL) has been broken.

LoFric® Sense™ is a single use product. Once used the unique surface coating will deteriorate and the catheter will no longer be sterile. LoFric Sense must not be placed on paper or cloth as these materials can absorb the catheter's liquid coating.
